AI Governance, Ethics & Security | Quantitative Risk Analytics | Climate & Credit Risk Modelling | Regulatory Engagement, Model Control & Governance |

United Kingdom

Summary

I am a quantitative risk analytics professional with 8+ years of experience in banking risk, focused on credit risk modelling, climate/ESG risk, ICAAP, model governance, regulatory engagement and risk management analytics.My work spans credit risk economic capital frameworks, climate physical risk and ISSB-related analysis, internal risk capital model development, remediation, monitoring frameworks, audit/regulatory review responses, and Python/MATLAB-based model implementation.I have led cross-functional projects and functionally managed/mentored team members across high-impact risk, model development, infrastructure and regulatory workstreams. I have worked closely with Risk, Finance, IT, Financial Engineering, Climate Risk and business teams to deliver model changes, improve data quality, strengthen controls and translate complex model outputs into clear stakeholder-ready insights.I also bring a software engineering background with experience in Python, MATLAB, SQL/Hive, automation, cloud/AWS environments, Android app development and earlier Unix game development projects.
I have completed AI/cloud-focused certifications including AWS AI Practitioner, Google Cloud Generative AI Leader and NVIDIA Generative AI LLMs.I am currently expanding my work at the intersection of quantitative risk, model governance and Generative AI, with a focus on regulated financial services use cases including AI controls, RAG, LLM evaluation, responsible AI, explainability and auditability.

Experience

HSBC

8 years 3 months

AVP / Quantitative Analyst

August 2023 - Present (3 years 3 months)

United Kingdom

Led quantitative risk analytics and model governance workstreams across Economic Capital, LGD and Climate/ISSB risk in a regulated banking environment.

Partnered with senior stakeholders across risk, model development, validation and business teams to translate complex model outputs into governance-ready decisions.

Developed strong domain expertise in model risk, regulatory expectations, explainability, controls and auditability across banking risk models.

Built capability on Generative AI, LLMs, RAG, AI controls and responsible AI to support financial services use cases.

More detail:
• Led work across credit risk economic capital, internal risk capital and concentration risk frameworks, supporting model development, implementation, monitoring and governance.
• Support climate/ESG risk analytics, including climate physical risk and ISSB-related analysis, translating methodology and model outputs into stakeholder-ready insights.
• Partner with Risk, Finance, IT, Financial Engineering, Climate Risk and business teams to deliver model changes, improve data quality and strengthen control frameworks.
• Support regulatory, audit and internal model review engagement through documentation, evidence packs, code walkthroughs, issue remediation and senior stakeholder updates.
• Contribute to LGD-related model development and credit risk methodology enhancements, combining quantitative analysis with model governance and business interpretation.
• Use Python, MATLAB, SQL/Hive and analytics workflows for data extraction, aggregation, reconciliation, model execution and reporting automation.
• Lead and mentor team members across high-impact model development, regulatory reporting, infrastructure and governance workstreams.

Manager
March 2022 - July 2023 (1 year 5 months)

Led different projects under credit risk analytics, economic capital, model development, climate risk and regulatory remediation workstreams across global and regional banking portfolios. Worked closely with model

development, validation, business, IT, risk and external consultant teams to deliver methodology enhancements, model governance outputs and stakeholder-ready analysis.

• Led and coordinated workstreams across credit risk economic capital, concentration risk, correlation development, SRT-related analytics, climate risk and ICAAP reporting.
• Supported model development and remediation activities across PD/LGD correlations, transition matrices, allocation methodology, securitisation-related analytics and model governance.
• Partnered with external consultants and internal teams on correlation model development, data review, methodology questions and documentation.
• Led climate risk methodology work for internal capital assessment, collaborating with climate risk, portfolio, advisory and data teams.
• Presented complex model outputs, methodology updates and issue remediation plans to senior stakeholders and regional teams.
• Mentored and supported team members across model development, reporting, governance and infrastructure workstreams.

Assistant Manager
February 2020 - February 2022 (2 years 1 month)

Delivered ICAAP, credit risk model enhancement, regulatory reporting, model documentation and process automation work across Group and regional portfolios. Supported model governance, validation/audit engagement and methodology implementation under tight regulatory timelines.

• Delivered ICAAP reporting and capital model development projects across Group and regional portfolios, supporting regulatory submissions and stakeholder review.
• Implemented credit risk model enhancements across migration loss, default identification, sovereign/corporate modules, provisions and stress-related analytics.
• Supported model validation, audit and regulatory review responses through documentation, code walkthroughs, evidence preparation and issue remediation.
• Built and improved model execution, reporting and data-quality control processes using analytical tools including MATLAB, Python/R-style workflows, SQL/Hive and Excel/VBA.
• Worked with Risk, Finance, IT, Stress Testing, IFRS 9 and regional teams to resolve data, methodology and reporting issues.

• Mentored newer colleagues and supported knowledge transfer across economic capital processes and model governance activities.

Analyst
August 2018 - January 2020 (1 year 6 months)

Supported regulatory reporting, model analytics, data-quality checks, automation and regional stakeholder engagement across banking risk portfolios. Built early expertise in ICAAP, economic capital, concentration risk, regulatory reporting and analytics infrastructure.

• Supported quarterly economic capital production, regional ICAAP reporting, data-quality checks and stakeholder query resolution.
• Worked on sovereign/corporate correlation modules, concentration risk, benchmarking analysis and model documentation.
• Automated and streamlined reporting and reconciliation processes, improving efficiency and reducing manual effort.
• Coordinated with regional Risk, Finance, IT, Stress Testing and IFRS 9 teams to resolve data and methodology issues.
• Contributed to early model development, reporting infrastructure and validation-response activities for credit risk economic capital frameworks.

Education

Jadavpur University, Kolkata
Master of Engineering - MEng, Computer Software Engineering

Heritage Institute of Technology
Bachelor of Technology - BTech, Electronics and Communications Engineering
